

Hardness Testers - Measuring Quality

## **DX 835 MOTORISED BENCH TOP STAND**

The DX 835 Axiotek motorised bench top stand features **electronic operation**: after installing the desired portable Shore hardness tester and selecting the head lowering speed, **simply press** the side button to carry out the test, determining the hardness value.

DX 835 is ideal for measuring all Shore hardness scales **A, B, C, D, DO, E, AO, O, OO**, in accordance with the standards of reference: **ISO 48-4 and ASTM D2240, ISO 868 and ISO 21509**.

Suitable for all **polymers, elastomers, rubbers and gel-like materials (such as plastics, rubber, medical items, paper and sponges)** of small to medium size and complex geometries.

## What are the immediate benefits?

- It eliminates human influence in test execution, therefore ensuring greater accuracy of results
- It maximises the reproducibility of measurements thanks to the electronic control of the probe descent speed, with programmable values from 0.5 mm/s to 16 mm/s
- It allows to measure **objects with complex geometry, thanks to the extensive kit of dedicated accessories** for the interchangeable specimen base

Possibility of adding a calibrated mass for all Shore scales on one instrument

### TECHNICAL DATA

- Weight: 17,5 kg
- Power supply: 115/230v - 50÷60Hz
- Supplied with calibrated mass for OO, OOO and OOO-S Shore scale
- Possibility of using the instrument in stand-alone mode

## Combine it with a portable electronic or analogue Shore hardness tester!

Reference standards: ASTM D2240, ISO 48-4, ISO 868 and ISO 21509
